

One of Dr. Susan's Favorite Nutritional Supplements—MaxGXL www.SusanSmithJones.com

Would you like to find out about a naturally occurring substance that acts as a master antioxidant, an immune system booster, and a detoxifier of numerous toxic chemicals and heavy metals like mercury? A substance that can help your body repair damage caused by stress, pollution, radiation, infection, drugs, poor diet, aging, injury, trauma, and more. Numerous research studies indicate that an antioxidant—glutathione—can do all that and more. Many have heard of glutathione, but do you really know what it is and how it functions in the body?

Glutathione is a tri-peptide (three amino acids in one molecule) that's so critical to cellular function that over 79,000 medical articles have been published on it. Glutathione (GSH) is the body's most powerful antioxidant—millions of times more effective than ingested Vitamins C & E. Under optimal conditions, it is produced by the body at a cellular level. Because GSH is also a powerful anti-inflammatory agent, and inflammation is every cell's deadliest enemy, GSH is one of the most important allies in preserving cellular health and preventing the development of disease.

GSH acts as an antioxidant within each individual cell. It detoxifies the body of at least twenty-four poisons we are all exposed to on a daily basis. Glutathione also works to help improve mental function, increase energy, improve concentration, permit increased exercise, improve heart and lung function, and promote better sleep—just to name a few. When optimal levels of GSH are available, a person often experiences renewed energy as well as radiant health.

Unfortunately, supplementation with glutathione supplements is virtually useless when it comes to raising the body's levels of GSH. As mentioned, GSH is a tri-peptide made up of three amino acids. **This tri-peptide cannot easily pass through the cell wall so it must be produced within the cell.** This process requires dietary precursors which often are not readily available through our diets. Up until recently, costly intravenous injections of GSH were the most efficient means of raising the body's glutathione levels.

Fortunately, because of a remarkable discovery resulting from over ten years of research by **Robert Keller, MD**, today we now have the ability to facilitate our body's production of glutathione at cellular level and increase intercellular GSH by as much as 300%. Dr. Keller's research provides us with a supplement containing the necessary precursors for the body's natural production of glutathione and the necessary cofactors that allow the liver to recycle oxidized GSH. Regarding Dr. Keller's research, Dr. John Nelson (John C. Nelson, MD, MPH, FACOG, FACPM: Past President and Board of Trustees of the American Medical Association) made the following comment. . .

This product represents the single most important breakthrough in health that I will witness in my lifetime. I believe it will revolutionize, change, and transform the practice of medicine worldwide and make Dr. Robert Keller more famous than Jonas Salk—who created the polio vaccine.

Briefly, this is why I believe everyone should include this supplement in his or her diet. **The human body was designed by God to be self-healing and to maintain optimal health.** It was designed to receive the nutrients to sustain vibrant health from a diet consisting of primarily raw, colorful plant-based foods free of chemicals and toxins. Unfortunately, in this day in which we live, it is often difficult to achieve and maintain an optimal level of wellness, even with the best diet and lifestyle. **The foods of today lack much of the nutrition that the same foods contained just a few decades ago.** We live in an environment where not only are many of our foods toxic from chemicals and environmental pollution, but our water and air is also polluted. **It has become increasingly more important to supplement our diet with nutrients that support radiant health and youthful vitality.**

Now **you** can take advantage of Dr. Keller's remarkable research and take this superlative glutathione accelerator daily, as I do, and also get **wholesale pricing** as a Preferred Customer by ordering through the following website: **www.4HealthBliss.com and click on Preferred Customer to order easily and quickly.** You will thank your lucky stars that you found out about this cutting-edge, breakthrough supplement and are making it part of your daily health regimen. **I would not be without this stellar nutritional supplement. Try it for just three months and see how much better you will feel and look.**
